

Installing a License on your SKAARHOJ Controller

If the controller is online

If your controller is online and has internet access through its network, it will automatically detect and apply any assigned licenses. You can confirm that your controller is connected to the internet by looking for a green icon in the upper right corner next to the SKAARHOJ logo.

Please navigate to the Settings tab and refresh the page once or twice. After doing so, you should see the license displayed in the license drop-down menu.

System Information

| System component | Installed version |
|--------------------|-----------------------------|
| Operating System | 1.2-pre3 |
| Device Type | Blue Pill Server (bluepill) |
| System Manager | v1.0.3-pre4 (31adffc) |
| Serial Number | 443034 |
| Ethernet IP | 192.168.11.5 |
| Ethernet MAC | 58:48:49:10:00:71 |
| IP on Access Point | 192.168.4.1 |
| Wireless MAC | 58:48:49:10:00:72 |

Licenses

| Name | Options |
|-------------------------|--------------------------|
| base | <input type="checkbox"/> |
| middlelane-early | <input type="checkbox"/> |
| dclink-tcp | <input type="checkbox"/> |
| xpanel-streamdeck | <input type="checkbox"/> |
| xpanel-xkeys | <input type="checkbox"/> |
| xpanel-hids | <input type="checkbox"/> |
| xpanel-touch | <input type="checkbox"/> |
| xpanel-riedelsmartpanel | <input type="checkbox"/> |

If the controller is offline

You can obtain a license in the form of a file, which you can upload via the Packages tab. If you haven't received your license file and need it for installation, contact support@skaarhoj.com with the panel's serial number for assistance.

To upload a license file, use the Upload button located at the bottom of the Packages tab, similar to how you would upload a software update on offline controllers.

Want to install a package manually?
