

Switcher Class Configurations

Switcher Class configurations are out of the box ready configurations!

They will provide you with all the most common functions that most people will need to control a switcher system. But we have also provided many layers of advanced features and options, that allow you to fully control most aspects of your device.

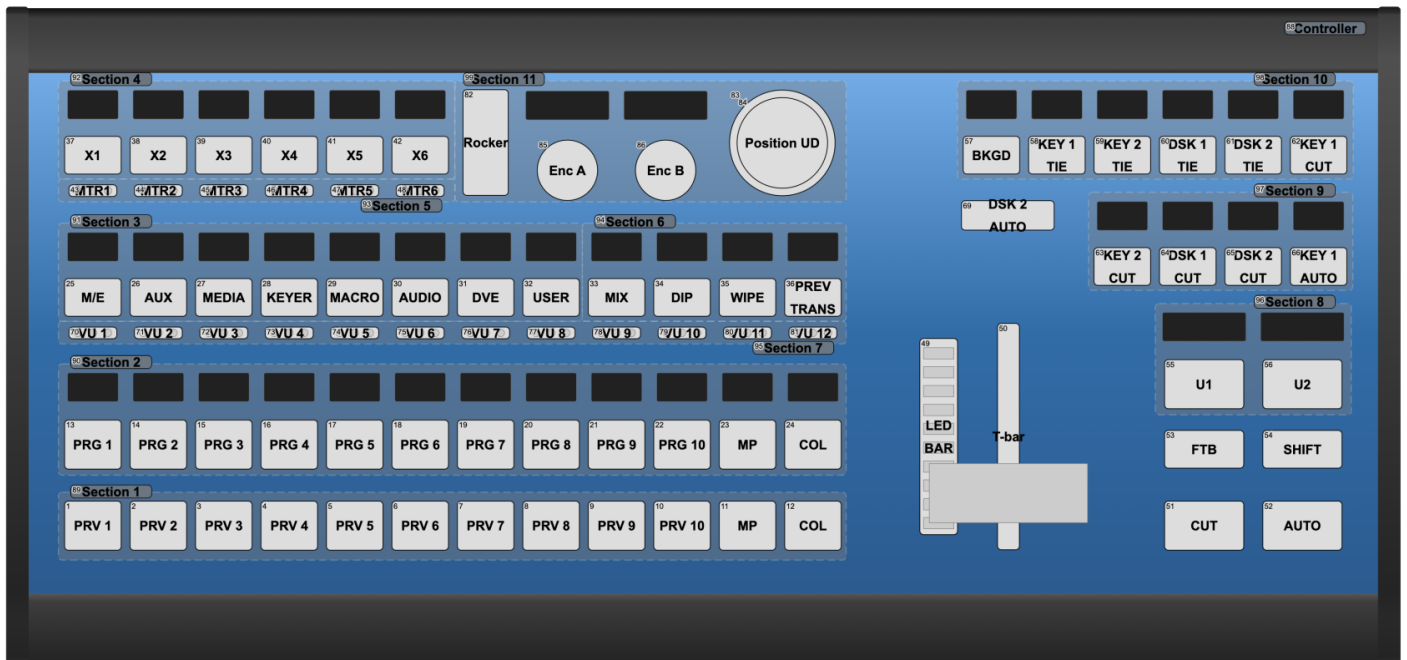

All **Switcher Class** compatible controllers are:

Air Fly

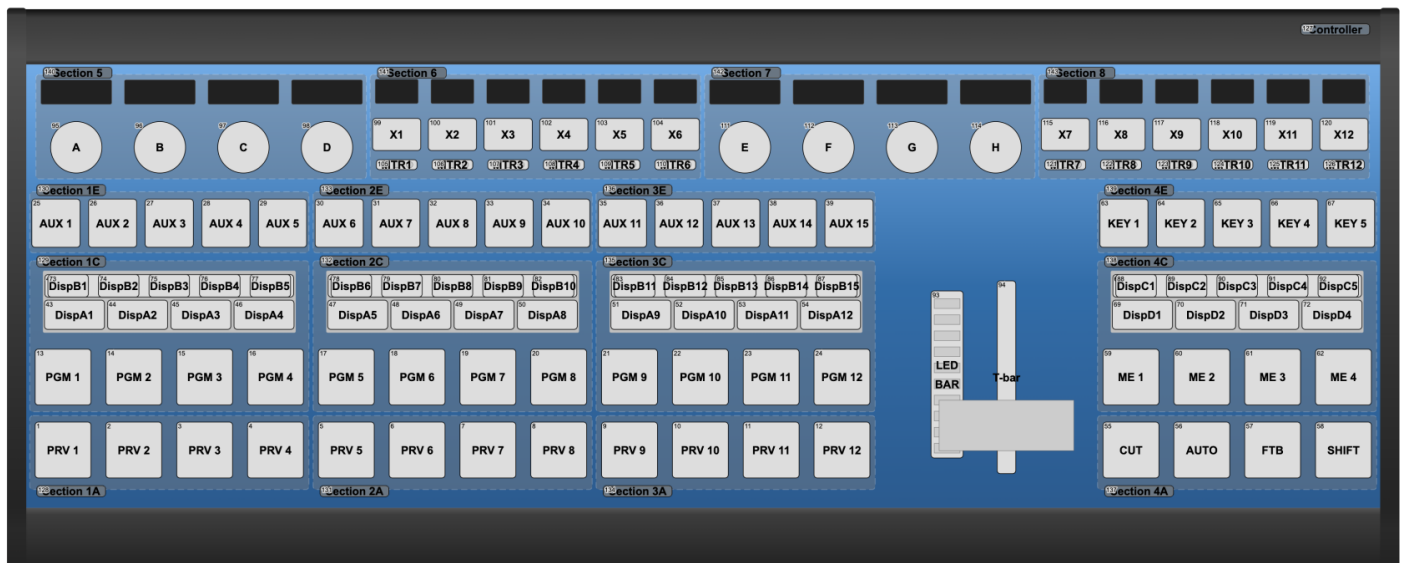

Air fly - for reference

Air Fly Pro (V1, V2, V3)

Air Fly Pro V2 - for reference

Master Key One (V1, V2)

Master Key One - for reference
