Incredible Productivity with Panasonic Kairos

SKAARHOJ

Panasonic KAIROS

Run your very flexible productions with Panasonic Kairos Video Switcher and SKAARHOJ controllers

#43

The image shows a Panasonic Kairos video switcher unit on the left and a SKAARHOJ controller on the right. The controller features a grid of buttons with various colors (green, yellow, red, blue) and a central joystick. The background is dark blue with circuit-like patterns.

Resources:

- [Video demo](#)

We are constantly developing on our integrations and this page will continuously be updated

Benefits

- ★ Tactile control over IP network
- ★ Controllers in all sizes, and with all components you need.
- ★ User-configurable layout
- ★ Create your own control surface - modularity from multiple SKAARHOJ modules

What to expect

SKAARHOJ's lineup of controllers all support Kairos using Blue Pill. They operate as an addition to Kairos Creator software by adding only the features that are needed to the tactile surface.

SKAARHOJ controllers can be used to Switch up to 10 layers in up to 20 scenes, of course with feedback and your custom naming from Kairos. Operate your transitions, execute your macros, or change the output on AUX. Even Playback control VTR/RAM players.

Application examples

- **Surface for your main Production** - Operate your main Scene from the surface you like most.
- **Extra Producer Panel** - Need an extra surface run two panels from the same Kairos
- **AUX Panel** - For your venue manager or light engineer, so they can see everything they need
- **Remote production** - Using a Blue Pill at the remote location and in the control room, SKAARHOJ surfaces mix and control live productions from distant location over VPN.

Technical Note

Kairos requires BluePill or SKAARHOJ panels with Blue Pill Inside (BPI).

For remote production BluePill or BPI should be used in each remote location - one BluePill would communicate locally with Kairos, another one with remote panels. VPN tunnel needs to be provided between remote locations.

Trophy #113

Flexible Control for Houses of Worship

SKAARHOJ

Benefits

- ★ Quickly adapt to changing team size and skill level
- ★ Accommodate different production types
- ★ Repurpose SKAARHOJ controllers quickly
- ★ Extend controller bank over time
- ★ Works with countless switchers and cameras

What to expect

With Blue Pill and Reactor, modularity is a reality and not just a dream. SKAARHOJ controllers are weaved seamlessly together through clever configurations that can be changed in a snap.

Churches experience vastly different production types and team sizes over the course of a week and with modularity you can keep cost down and create control experience for the novice and skilled volunteer alike.

Model Support

- Switcher system examples: ATEM, vMix, TriCaster, Kairos
- Camera brands: Sony, Panasonic, Canon, NewTek, PTZ Optics, Vaddio, JVC, Marshall, AIDA

Configurations

SKAARHOJ provides various default configurations for controller combinations. Here are a few examples:

"Air Fly Pro + XC7 - ATEM"

"Air Fly Pro + XC7 - vMix"

"Inline 22 + XC7 - Generic" - For PTZ control of any supported camera profile.

Blue Pill and Reactor

Blue Pill is a SKAARHOJ platform that boosts the capacity and capability of SKAARHOJ UniSketch controllers. Reactor is our flagship panel management application running on Blue Pill or Blue Pill Inside (BPI) powered controllers.
