

# Trophy #114: RED Multicam Control with Color Fly

## Resources

- [RED Komodo](#) - Accessories and settings to connect
- [RED V-Raptor](#) - Accessories and settings to connect
- [RED RCP2 Device Core parameters](#) - all the parameters we support (both cameras)
- [Color Fly](#) - Product details and price
- [Blue Pill / Reactor](#) - Getting started
- [Video demo](#)

We are constantly developing on our integrations and this page will continuously be updated

**SKAARHOJ**

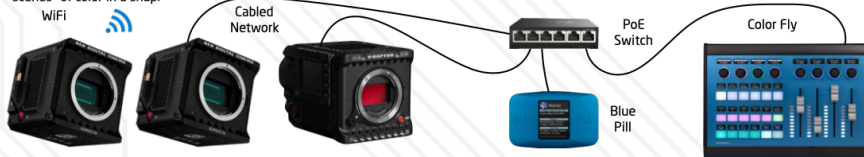

- ★ Use your RED KOMODO and V-RAPTOR in Live Production
- ★ Super compact multi camera control panel
- ★ Mix RED KOMODO and V-RAPTORs cameras
- ★ Individual camera features respected in control
- ★ Easily add and rearrange cameras
- ★ Supported by RED
- ★ Lens control internal or external
- ★ Color presets lets you instantly store and recall settings

Take advantage of the unique images created by REDs highend cinematic cameras in your live productions. With SKAARHOJ Color Fly it's easy to control iris and match colors on multiple RED cameras simultaneously.

Color Fly is a very compact multi camera control panel and with the power of Blue Pill / Reactor you can easily manage multiple pages of cameras with instant access. Adding and rearranging cameras is easy in a web interface.

Lens control can either be through the camera with compatible lenses or via external lenses from Fujinon. Just pick the right camera profile for each camera.

Color Fly can store and recall settings from the camera so you can recall "scenes" of color in a snap.

- RED KOMODO
- RED V-RAPTOR

Based on the generic Color Fly configuration you can select "RED KOMODO" as your camera profile (Std. Class) when adding cameras.

- **"RED RCP2 - Standard Class"** - Default configuration
- **"Fujinon Iris Control via RS-232"** - Fujinon Lens control via RS-232 and Blue Pill (other workflows exists)

Also check out the RCP Pro SKAARHOJ controller for sublime individual control of RED KOMODO and V-RAPTOR.

The camera can be accessed via Wifi or with cabled ethernet connectivity (optional RED accessory). SKAARHOJ always recommends cabled workflows if possible.

Color Fly works through the Blue Pill to control the cameras.

Long distance control from Europe to USA has been tested successfully for remote studios.
