- [Blue Pill / Reactor](#) - Getting started

We are constantly developing on our integrations and this page will continuously be updated

Trophy #19

Rack Fusion Live - ATEM

SKAARHOJ

Benefits

- ★ Control ATEM and PTZ cameras from the same controller
- ★ Mix camera models and brands freely and easily
- ★ Connects directly with ATEM
- ★ Virtually no limits to number of cameras
- ★ Connect other panels to expand (UniSketch or BPI)
- ★ Lots of power - Blue Pill Technology Inside

What to expect

Rack Fusion Live is a compact hybrid controller for modern live production on the road. With Blue Pill Inside (BPI) it's running the latest SKAARHOJ platform with enough resources to connect to dozens of cameras and any switcher system simultaneously.

The panel management software, Reactor, makes it super easy to discover and add any PTZ camera model and brand. You can even mix them and retain the unique, curated configuration we have made for each model.

Rack Fusion Live will connect directly with both ATEM and the cameras - no computer or proxy software is needed in between.

Model Support

- PTZ models from Canon, Panasonic, Sony, BirdDog, AIDA, PTZ Optics, Avonic, Vaddio etc. are supported. Mix and match freely.
- Blackmagic Design ATEM switchers - all models

Configurations

- **"Rack Fusion Live - Generic"** - Just add ATEM as switcher and the cameras you wish to control.

Blue Pill Inside

Rack Fusion Live with Blue Pill Inside (BPI) option is a powerful upgrade to this popular rack controller from SKAARHOJ. The BPI option enables Reactor, a new user friendly and powerful management software developed by SKAARHOJ. Reactor can integrate other SKAARHOJ panels and integrate control of dozens of devices such as cameras and switchers.

Blue Pill and Reactor

Blue Pill is a SKAARHOJ platform that boosts the capacity and capability of SKAARHOJ UniSketch controllers. Reactor is our flagship panel management application running on Blue Pill or Blue Pill Inside (BPI) powered controllers.
