

Trophy #38: Deep control of many and any PTZ camera

The advertisement features a dark blue background with a subtle circuit pattern. At the top left, the text "Deep control of many and any PTZ camera" is written in large, bold, white font. To the right of this text is the "SKAARHOJ" logo in white. Below the main text, there is a collection of various PTZ cameras from different brands, including Canon, Panasonic, and Skaarhoj, arranged in three rows. On the right side, a large image of the "PTZ Pro" control panel is shown. The panel has a blue screen displaying camera settings like "Marku F5.4 1/100 2dB" and a grid of colorful buttons. Below the panel, the text "PTZ Pro" is written in white. At the bottom left, a paragraph states: "SKAARHOJ panels with Blue Pill Inside will let you connect to and control dozens of PTZ cameras simultaneously and mix brands and models without losing the fine control." In the bottom right corner, there is a gold trophy icon with the text "#38" next to it.

Trophy #38

Deep control with PTZ Pro

SKAARHOJ

Benefits

- ★ Tactile control of PTZ cameras
- ★ Many and any camera brands and models can be mixed
- ★ Deep integrations with every model and brand
- ★ Large display shows settings clearly
- ★ Easy to use, easy to set up
- ★ Interchange camera selector and preset buttons
- ★ Adjust focus with dedicated knob
- ★ Practical form factor

What to expect

With PTZ Pro you not only get tactile control of PTZ cameras but a deep integration with exactly your camera instead of the lowest common denominator - we support all the unique features of your exact camera. You can add as many cameras as you like and mix brands and models freely. It's very easy to add and rearrange cameras in the web UI.

PTZ Pro has a large display that shows all settings clearly. There is a dedicated focus knob next to the joystick and you can interchange the preset and camera selector with a press of a button. It's a very practical and popular control panel.

Model Support

- Canon PTZ cameras, all models
- Panasonic PTZ cameras, all models
- VISCA PTZ cameras, many brands, all the big ones
- Vaddio cameras
- Non-PTZ cameras and composite kits (PT head + camera)

Configurations and Alternatives

- **"PTZ Pro Generic"** - Default configuration

Use the generic PTZ Pro configuration, and as you add cameras, you can pick individual deep configurations for each camera to get the level of control you desire. Reactor makes it easy to get advanced control.

Consider adding a Frame Shot panel with PTZ Pro to have visual thumbnails of your preset positions.

Blue Pill and Reactor

Blue Pill is a SKAARHOJ platform that boosts the capacity and capability of SKAARHOJ UniSketch controllers. Reactor is our flagship panel management application running on Blue Pill. Blue Pill technology is also available as an option (BPI) for many controllers as an alternative to UniSketch.
