

Trophy #47: Master Key One

Master Key One

SKAARHOJ

The image shows the Master Key One control panel, a professional video switcher interface. It features a large array of buttons for selecting cameras and effects, a central joystick for navigation, and various status indicators. The panel is designed for use with multiple switcher systems.

Logos for compatible systems are listed on the left: Blackmagicdesign, vMix, Panasonic, NewTek, and vizrt.

Work with many different switcher systems - but never change your control panel!
With Master Key One you invest in the only really extendable universal solution on the market.

Trophy #47

Master Key One

SKAARHOJ

Benefits

- ★ Universal switcher panel - multiple brands supported
- ★ Grow easily with modular extensions
- ★ OLED displays for labels - world wide language support
- ★ Premium Hall Effect T-Bar with LED and state display
- ★ Updated design and Blue Pill Inside

What to expect

Master Key One is our top of the line universal broadcast switcher panel with configurations for ATEM, vMix, Panasonic Kairos and TriCaster systems. It's available with Blue Pill Inside and an updated design and new beautiful T-Bar with LED ring and display.

The power of Blue Pill technology makes it a perfect master for modular arrangements. The MK48 known from the SKAARHOJ Mega Panel is a perfect way to add another 48 or 96 buttons for the panel.

The OLED displays can show labels with support for world-wide glyphs via UTF-8. Labels can be sourced from the switcher or be overridden directly in the Reactor Web UI. Each channel can be set up with its own color code too.

Switcher Systems Supported

- vMix
- ATEM - all models
- Kairos
- TriCaster - many models

Modularity with MK48

The power of Blue Pill Inside lets you easily add a UniSketch or BPI based MK48 controller to extend the number of direct input selects.

Blue Pill and Reactor

Blue Pill is a SKAARHOJ platform that boosts the capacity and capability of SKAARHOJ UniSketch controllers. Reactor is our flagship panel management application running on Blue Pill. Blue Pill technology is also available as an option (BPI) for many controllers as an alternative to UniSketch.
