Mega Panel 1M/E - ATEM

SKAARHOJ

Benefits

★ Professional switching with ATEM - you deserve it!
★ World Class Broadcast buttons from NKK
★ ATEM source names and functions shown on displays
★ Precision Hall Effect T-bar
★ Grow or shrink easily with modular MK48 panels
★ Simple configuration of inputs to buttons
★ Blue Pill Inside powered - all-in-one box

What to expect

For professional broadcast applications of ATEM switchers, SKAARHOJ is proud to offer the Mega Panel modules to deliver a premium control experience. The Mega Panel has clear OLED displays and Japanese NKK broadcast style buttons. The T-Bar is a SKAARHOJ custom premium component with LED ring for color coded identification.

The SKAARHOJ Mega Panel is modular - you add or remove sections depending on your production. MK48 is the crosspoint surface serving the input delegation while MKT1A (or B) is the transition block with keys for menu, keyers, transition selection etc.

Reactor - the panel software - makes it super easy to arrange the order of your switcher inputs to the buttons.

Modularity of the Mega Panel

The SKAARHOJ Blue Pill platform is essential for the Mega Panel. Blue Pill hosts the panel management software Reactor which is designed to integrate multiple control panels to one single, seamless interface. You basically add panels, select a configuration for them, and you are set.

Blue Pill Stand-Alone vs Inside

Blue Pill exist in a stand-alone version, but many SKAARHOJ controllers exists with a Blue Pill Inside option. For Mega Panels we recommend to purchase the MKT1A or B modules with BPI so they can act as master panels for the MK48 modules. Generally, adding BPI options to panels won't be necessary but will typically provide a performance boost with more snappy panel responses.

Configurations

- **"Mega Panel 1M/E for ATEM - Medium"** - configuration for a 2x MK48 panel

Blue Pill and Reactor

Blue Pill is a SKAARHOJ platform that boosts the capacity and capability of SKAARHOJ UniSketch controllers. Reactor is our flagship panel management application running on Blue Pill or Blue Pill Inside (BPI) powered controllers.
